

Facebook Data Deletion Instructions

Tansee Inc. is a software developer focused on transferring data from iOS/Android platforms to PC/Mac. According to the Facebook Platform Policies, Tansee needs to provide you with Facebook data deletion instructions.

Tansee stores Facebook data in the following files:

ANTS file (click [here](#) for more information)

ANTA file (click [here](#) for more information)

TFST file (click [here](#) for more information)

TFSA file (click [here](#) for more information)

To prevent Tansee applications from accessing your Facebook basic information, you can remove your Facebook data from the Tansee files.

Below are instructions on how to do so:

Deleting the corresponding Facebook data can be achieved by removing the .ANTS, .ANTA, .TFST, or .TFSA file.
