## What to Do If 'Tansee iPhone Message Transfer' Does Not Show the Latest Messages?

- First step is to install the latest version of Tansee software. Please download the Windows version from <u>here</u> or the Mac version from <u>here</u>.
- Install and open the software you downloaded in the previous step. Follow the <u>Guide for Windows</u> or the <u>Guide for Mac</u>, depending on your operating system.

Please be patient. If you have a large number of apps or photos, it may take a longer time to read the data, possibly several hours at most.

- <sup>3</sup> If the issue persists, follow these steps for the Windows version: Run iTunes and backup an iPhone or iPad using iTunes on your PC.
  - Run Tansee without plugging in your iPhone. Under the 'iTunes backup' tab in Tansee, click on your iPhone.
